PROFILE

Senior Techno-Functional Expert with 22 years of IT experience, including over 10 years within the IBM Maximo ecosystem. Dual expertise: Maximo 7.6.1.x (full EAM lifecycle coverage, advanced configuration), and MAS 9 (end-to-end migration on OpenShift infrastructure, deployment of Manage, Health, Predict, and Monitor). Full-stack EAM profile covering solution architecture, business configuration, technical integration, and project management across various sectors: Energy, Telecoms, Industry, and Banking.

EDUCATION

BACHELOR'S IN COMPUTER SCIENCE

CNAM, Paris
2013 – 2014

ASSOCIATE DEGREE IN IT

ISET, Tunis
2000 - 2003

IBM CERTIFICATIONS

IBM Champion 2026, IBM Advocate
2025, IBM Contributor 2025

PROFESSIONAL EXPERIENCE

SENIOR TECHNO-FUNCTIONAL CONSULTANT & MANAGER SINORFI : JANUARY 2016 – PRESENT

Applications Operations Lead (AOL) – SUEZ IT March 2026 – Present

- Managing operations of a critical Maximo ecosystem, acting as the central interface between business units and the Maintenance Services (TMA).
- Business Relations & User Management: Requirement gathering (incidents and change requests), ticket management and prioritization via ServiceNow.
- Application Managed Services & Delivery Steering : Technical resource management and DevOps sprint oversight (bug fixes, enhancements, test campaigns).
- Governance & Operational Continuity: Supervision of system stability and chairing governance committees.
- L3 Technical Expertise: Diagnosis and resolution of complex anomalies (Automation Scripts, Workflow, MBO/AppBean).
- Participation in the strategic MAS 9 build project at SUEZ (design phase, architecture definition, and AppPoints licensing model).

Internal Project: ISO 9001 & 27001 Project Manager – SINORFI January 2026 – Present

- Leading the dual ISO 9001 and 27001 certification project.
- Mapping and formalizing business, technical, and delivery processes.
- Creating the complete documentary framework and deploying security controls.
- Managing internal audits and remediating gaps in preparation for final certification.

TECHNICAL SKILLS

IBM MAXIMO 7.6

Functional

- Work Orders (CM/PM/SR), Job Plans, PM Routes, Asset & Location Hierarchy
- Inventory: Storerooms, Item Master, Reorder Points, Lot/Rotating items, Receipts, Issues & Transfers
- Procurement: PRs, POs, Invoices, Vendors, Contracts, SLAs, Escalations
- Service Requests, Safety Plans

Configuration

- Application Designer: screen/tab/section customization, conditional UI, signature options
- Database Configuration: Objects, Attributes, Domains (ALN, Numeric, Table, Crossover), relationships
- Workflow Designer: multi-branch flows, role-based assignments, manual/automatic transitions
- Automation Scripts (Jython/JS): launch points, MBO manipulation
- Escalations, Cron Tasks, Actions, Communication Templates, Sets & Organizations

Integration

- Integration Framework: Object Structures, Enterprise Services, Publish/Invocation Channels, End Points (HTTP, JMS, File, Web Service)
- REST/OSLC, SOAP/WSDL, JMS/MQ

Data & Migration

- MxLoader, ETL pipelines, Python/SQL bulk scripts
- Data migration methodology: mapping, validation, UAT, cutover planning

Architecture & Performance

- WAS/Liberty: multi-node cluster, JVM tuning, classloader management
- DB schema, SQL tuning, index & execution plan analysis
- Oracle / SQL Server / IBM DB2, LDAP/AD security integration
- Log analysis: SystemOut, ffdc, root cause diagnosis

Internal Project: MAS 9 Migration & Deployment – SINORFI

July 2025 – December 2025

- Led migration from Maximo 7.6.1.1 to MAS 9: data audit, porting of customizations (Automation Scripts, Workflow, App Designer), and production validation.
- Evaluated and sized the MAS 9 licensing model (AppPoints) to optimize costs.
- Deployed MAS 9 on Linux / Red Hat OpenShift: configured OCP operators, YAML Custom Resources, namespaces, and PVCs.
- Middleware setup: Db2u (connection, runstats, tablespaces), MongoDB (collection verification), Kafka AMQ Streams (IoT topics).
- Configured MAS IAM/SSO (LDAP Identity Provider) and MAS role management.
- Automated continuous deployment via Ansible and Helm; implemented Prometheus/Grafana monitoring.
- Facilitated Key User workshops to define usage standards for Manage, Health, Predict, and Monitor; configured asset scores in Health and IoT data flows in Monitor.

Client Manager and EAM Tech Lead : SUEZ

September 2021 – December 2025

- Operational steering and client interface for a critical Maximo ecosystem (eMAT, Trimera, ACTIMEO, IPOP, MAXIMO R&V).
- L3 Support: Diagnosis and resolution of complex anomalies (MBO, AppBean, Jython Automation Scripts, Workflow, Integration Framework).
- Supervision of development teams; conducted systemic audits on complex Maximo infrastructures.
- Design and development of customizations: Application Designer, Database Configuration, Automation Scripts, field personalization.
- Active participation in steering and monitoring committees.

Senior Techno-Functional Consultant – TUNISIA TELECOM

January 2020 – August 2021

- Multi-site deployment of Maximo Asset Management; harmonization of EAM processes (CM/PM Work Orders, Job Plans, Maintenance Routes).
- Advanced configuration: Cron Tasks, roles, data restrictions, Workflow Designer, Automation Scripts.
- Custom application development (Inventory, Procurement, Billing); advanced BIRT reports and MxLoader data loading.

MAS 9

Deployment & Migration

- Maximo 7.6 → MAS 9 migration: assessment, data upgrade, configuration lift & shift
- Manage deployment on OCP: operators lifecycle, YAML CR authoring & troubleshooting
- Pod diagnostics, log analysis, certificate management, storage issues resolution

Middleware & Connectivity

- Db2u: database operator management, schema validation, performance checks
- MongoDB & Kafka/AMQ: basic configuration, health monitoring, troubleshooting
- IAM/SSO: SAML 2.0 federation, SCIM user provisioning, LDAP/AD integration

Manage Application (MAS 9)

- Functional & technical configuration carried over from Maximo 7.6 expertise
- Workflows, Automation Scripts, Integration Framework adaptation to MAS 9 context
- Data migration: MxLoader, upgrade scripts, post-migration validation

MAS Applications

- Health & Predict: asset health scoring, failure prediction, integration with Manage
- Monitor: IoT data streams, anomaly detection rules, dashboard configuration

Monitoring & Troubleshooting

- Prometheus / Grafana: reading dashboards, identifying bottlenecks
- Operator reconciliation error diagnosis, environment health checks

TOOLS & TECHNOLOGIES

- OpenShift / oc CLI , Ansible, Docker
- Helm, Terraform, Azure DevOps
- BIRT, Cognos Analytics, KPI & Start Centers
- Oracle, SQL Server, IBM DB2
- IBM WebSphere, IBM HTTP Server
- Linux, Windows Server, Active Directory, VMware vSphere
- ISO 9001 & 27001
- Agile, V-model, Change Management, UAT

Senior Techno-Functional Consultant - ALGERIA GULFBANK

July 2019 – December 2019

- Post-implementation remediation on IBM Control Desk (ICD): audit and correction of critical bugs (Workflow, Automation Scripts, UI).
- ITAM module optimization and incident/service request workflow redesign.

Technical Consultant – STEG TUNISIA

June 2018 – June 2019

Configuration of Procurement, Inventory, and Maintenance modules for the energy sector.

WebSphere installation; modeling of complex approval workflows; BIRT reports (PO and invoice tracking).

Techno-Functional Consultant – ENI TUNISIA

June 2017 – May 2018

- Maximo deployment : configuration of Cron Tasks, roles, Procurement/Work Order workflows, and custom business applications.
- Implementation of preventive/corrective maintenance plans and design of BIRT reports.

Junior Techno-Functional Consultant – STAM TUNISIA

January 2016 – May 2017

- Supported Maximo go-live on-site
- conducted user training sessions
- contributed to data migration via MxLoader

SYSTEM AND NETWORK ADMINISTRATOR

MINISTRY OF THE INTERIOR – TUNISIA : 2003 – 2015

- Expert administration of Oracle and SQL Server databases, including query optimization and data flow security via rigorous maintenance plans.
- Migration and consolidation of physical servers to a VMware virtualized architecture, improving IS resilience and flexibility.
- Deployment and administration of Citrix solutions and secure Cisco network infrastructures (VPN, Firewalls).
- Development of an internal application catalog (VB6, PHP/MySQL) with high expertise in optimized SQL procedures.
- Implementation of a continuous technical training program for employees, facilitating technology adoption and service continuity.
